

The **SWOWEA** Young Professionals and Watershed Committee is hosting a free tour (with **one contact hour**, pending approval) on **Friday, April 8th** in Milford beginning at **11:00 AM**. The tour is at the **Cincinnati Nature Center Algaewheel Treatment Plant Facility** where we will see an overview of the environmentally friendly wastewater treatment process. The Algaewheel Treatment Plant provides primary and secondary treatment and has a biological treatment capacity of 1,525 gallons per day with a two times daily peaking factor. The Ohio EPA is in the process of considering Cincinnati Nature Center's request to increase design flow to 3,700 gallons per day. The Algaewheel Treatment Plant has a hydraulic capacity of 7,500 gallons per day. After the tour we will then enjoy a box lunch at the Cincinnati Nature Center's Krippendorf Lodge. No PPE is necessary but there will be gravel walkways so do wear appropriate shoes for the outdoor terrain. Please arrive on time for the Cincinnati Nature Center Algaewheel Treatment Plant tour to begin at 11:00 AM.

Following the ATP tour, meet at Cincinnati Nature Center's Krippendorf Lodge for Lunch, sponsored by HP Thompson and OneWater Inc.

RSVP online by April 4th <http://www.viethconsulting.com/Calendar/moreinfo.php?eventid=38780>
Please forward to anyone who may be interested! If you have any questions, contact Monica Morales at mmorales@hazenandsawyer.com
